

Sprint Review 2 — Ordering and Payment

Sprint goals

To enhance ordering process with payment methods and include order tracking

Order Placement

- Customers can choose delivery or takeout
- Orders validated for availability
- Order confirmation page is clear and user friendly

Payment Processing

- Multiple payment options are accepted
- Payments validated before confirmation
- Payment errors handled gracefully

Order Tracking

- Orders assigned unique IDs
- Customers can track order status
- Real time status updates provided

Demos

Demo	Feedback
Order Placement	Feedback: Takeout and delivery options worked. Group Concern: Should we add location based delivery fee calculation?
Payment Processing	Feedback: Payment methods worked. Suggestion to include cash, pay-in store option Group concern: Will there be a reward system?

Complete tasks

Done:

- Takeout and delivery order placement complete.
- Basic order tracking functionality implemented.

Needs More Work:

- Delivery fee calculation moved to the next sprint.

Upcoming

- Add location-based delivery fee calculation.
- Add pay-in store with cash payment option
