

Sprint Review 1 — Guest and Menu basics

Sprint goals

To implement basic features for guest ordering and menu management. Guests will have the ability to place orders and staff should be able to manage menu items.

Guest Order

- Guest can place orders without accounts
- Orders save in the system
- Guest will not be prompted to create an account

Menu Management

- Staff can add new menu items
- Staff can update existing menu items
- Staff can remove outdated menu items

Demos

Demo	Feedback
Guest ordering - Guest order placement	Feedback: Smooth ordering process for guest and suggestion to add order confirmation email Group Concern: Should we allow guest users to track orders without an account?
Menu Management - Menu item endpoints.	Feedback: intuitive interface for staff to manage menu Group Concern: Can we validate ingredient fields to prevent incorrect entries?

Complete tasks

- **Done:**
 - Guest ordering feature
 - Menu management endpoints were tested and are functional.
- **Needs More Work:**
 - Bulk menu editing requires more development (moved to next sprint).

Upcoming

- Add order confirmation emails for guest users.
- Develop a tracking mechanism for guest orders.
- Expand menu management to support bulk editing.
